

ERP for Business Leaders

For Presidents, CEOs, Owners, Partners, and Founders

Leading a growing business means carrying more responsibility and more uncertainty at the same time. A month-end P&L can't tell you what's happening right now, and decisions don't wait for the close. Acumatica cloud ERP gives business leaders a real-time, connected view across production, sales, service, and finance — so you can act on facts instead of instinct, from anywhere.

KEY BUSINESS BENEFITS

- See revenue, margins, and cash flow in real time — not just at month-end close
- Automate routine work across finance, inventory, and service so your team focuses on higher-value work
- Catch margin erosion before it forces hard decisions
- Scale users and transactions without per-seat penalties or surprise costs
- Apply AI to clean and connected data — not disconnected spreadsheets — while staying in control of every decision

Grow Revenue from the Customers You Already Have

New business matters, but your fastest path to growth is often already in your customer list. Acumatica connects every customer relationship — from first sale through ongoing service — in one system, making it easy to surface upsell and cross-sell opportunities and strengthen loyalty with faster response times and self-service options.

Put AI to Work Without Losing Control

AI is only as good as the data behind it. Acumatica applies AI to your clean, centralized data to automate routine workflows across finance, inventory, procurement, and service, and to deliver predictive insight for cash flow forecasting, inventory planning, and sales timing — with people always in the driver's seat.

Make Decisions on Data You Can Trust

Growth only counts when it's profitable. Acumatica gives leaders a live view of revenue, margins, cash flow, and costs, with role-based KPIs and automated alerts that surface problems before they become headlines — all from a single version of the truth.

Protect Margins Before They Slip

When costs rise, every decision matters. Acumatica lets you compare budget to actual by product, job, or project, automate payables and procurement to close the door on leakage, and see clearly where the business is making money and where it isn't.

Scale Without Starting Over

Growth shouldn't force you to replace the systems that already work. Acumatica scales users and transactions without per-seat fees, supports multi-entity and multicurrency growth, and connects to specialized tools through open APIs — deployed in the cloud, on-premises, or hybrid, as your needs evolve.

REAL RESULTS FROM ACUMATICA CUSTOMERS

- 3x revenue increase from operating more efficiently
- 30% time saved with automated timecard and purchase request processes
- 8 hours/day saved by eliminating manual spreadsheet work through MRP automation
- 20% boost in repeat purchases with integrated sales, inventory, and fulfillment data

About Acumatica

Acumatica Cloud ERP is a comprehensive business management solution built for connected, collaborative ways of working. Designed for small and mid-market companies, Acumatica's flexible platform, transparent licensing, and industry-specific functionality help growing businesses adapt to fast-moving markets and take control of their future.
